

# maine vision

. . . executive furniture for the home & workplace . . .

Mainevision is an exclusive range of furniture which challenges the traditional perception of metal furniture by using curves, cut-outs, and geometric shapes to create a retro feel. The sensitive detailing and beautiful finishing is a hallmark of Maine's manufacturing excellence, lasercut and hand-finished. The range is equally appropriate for home or workplace, from management office to designer's studio, each item tailored to individual requirements. Mainevision is available in a variety of widths and heights and can be a gloss or standard finish chosen from any of Maine's colour options.

All Maine units are 98% recyclable with 40% recycled previously.
