

'a place for everything
and
everything in it's place'

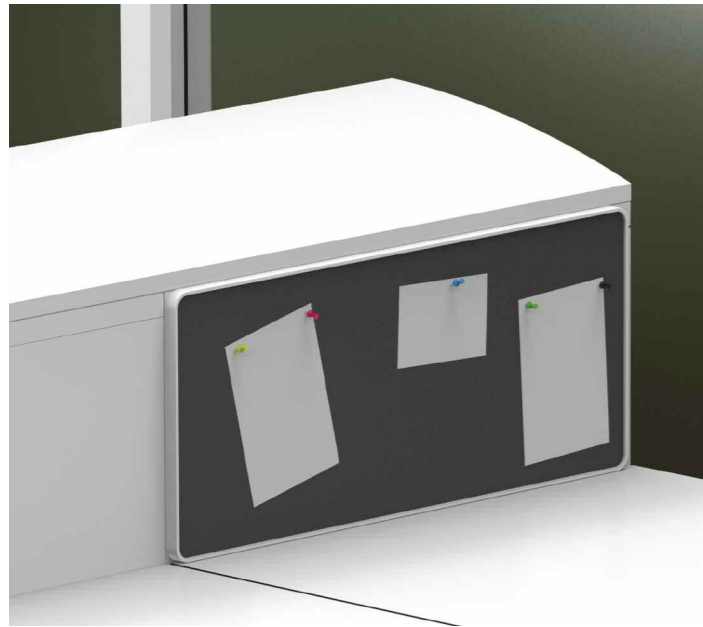

desk storage

maine

Custom features

Custom features such as pin boards, white boards and tool rails can be incorporated into the design to organise work areas.

Worktops can be classically flat topped, sloped or domed. To co-ordinate with the workspace, different designer surfaces such as wood or glass can be fixed on to the units.

Pedestals & Mobile units

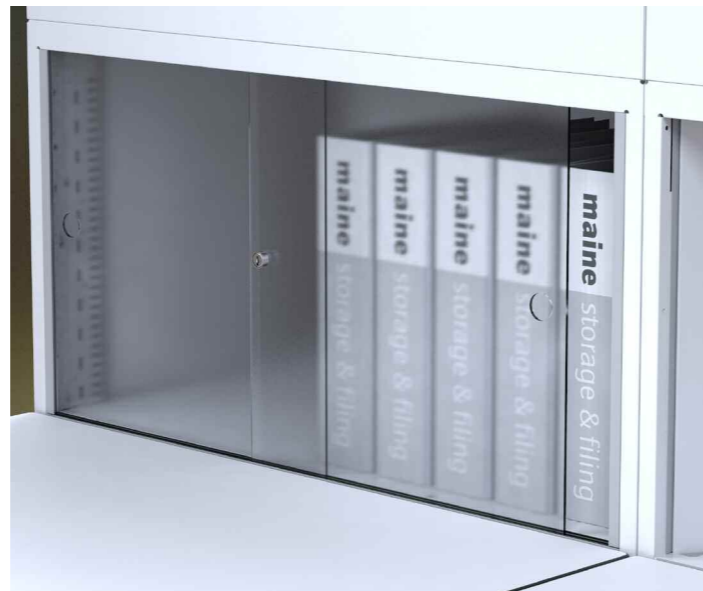

Pedestals can be specified to hold stationary, binders and hanging files. Alternatively they can store personal effects.

Adding a seat cushion on the unit creates additional seating.

Accessories

All units can be fitted with tool rails for a variety of file sizes. Pen trays and A4 paper trays can be specified if required.

Sliding doors

Sliding doors for ease of use, can be specified in either matching coated steel or coloured Perspex to suit your office colour scheme.

Perforated fronts incorporating sound deadening foam are also available.

Planters

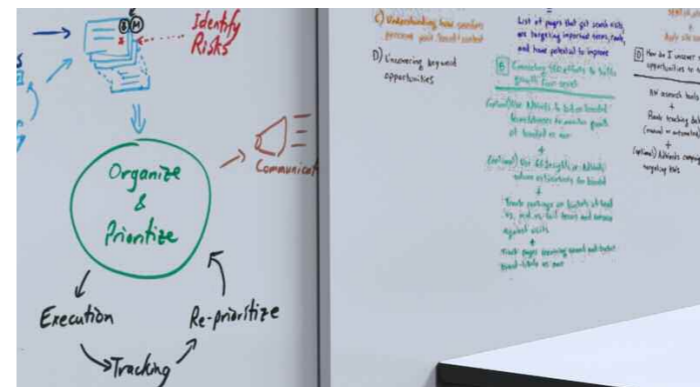

Introducing plants into the work environment is beneficial for health and wellbeing. Plants help to improve the working environment by filtering and circulating air. Rather than ad-hoc plant pots, planters divide the workspace in an attractive and organised manner.

Planters can be plain or with weave pattern. Coloured panels add a natural dimension which is aesthetically pleasing.

Lockers

Lockers can be incorporated into unit storage design to accommodate valuable items and secure files. Post slots can be added to the doors to allow for items to be easily deposited. Various mechanical and digital locks can be fitted.

Colours and finishes

As well as the standard BS, Ral, Pantone or Dulux colours, anti bacterial, anti graffiti or dry wipe finishes can be specified.

Charging points

Charging points can be placed at convenient specified intervals within any unit, including USB and 3-pin sockets to facilitate charging during the working day.

Towers

Maine towers can be desk or screen height. This provides a secure efficient and stylish extension to the work surface. Internal configurations can be tailored to specific requirements
