Allocation of personal storage

A locker can be made available for each member of staff.

Alternatively electronic locking solutions can be used to reduce the amount of storage needed, with users being able to identify a locker, should one be required.

Electronic Lock technology allows easy allocation of personal storage space, when required, reducing inventory and space.

mainelockers

Location / Proximity

Lockers can provide partitioning between work groups. Lower units may also lend themselves to transactional work surfaces.

Security

Keys are a simple form of security for allocated personal space, but loss of keys and access by FM staff can prove a burden. Electronic solutions, whilst having a higher outlay, are a much better long term solution in terms ease of allocation, control of use, and overall storage management.

Deciding the amount of available space

Consideration for Business equipment, Sports and Cycle wear and other items that may require storage space, in order to keep the working area clear and tidy.

Identification

For both permanent and allocated storage, identification is important to ensure both users and FM staff. Labelling by number disc, business card holder or other simple identification, can greatly assist in management and clear identification.

Accessibility

To ensure the best access to Lockers at all levels, Lockers can be specified with a number of different height plinths, or alternatively Locker Drawers.

Aesthetics

Lockers can be finished in neutral colours to blend in with the fabric of the building, or alternatively, vibrant corporate, or even retro finishes and styles, making a true feature of the furniture.

Additions

Locker systems can also be specified to facilitate the charging of Mobile Phones, Tablets and Laptops

Z lockers

The perfect solution for a changing room, or shower room. Z Lockers combine the convenience of a standard full height locker with the ability to hang items of clothing, whilst maintaining cycle helmet space etc, maximising the quantity of lockers available in those more confined areas.
