**maine**

Maine are leading designers of storage and filing systems in the UK, all of their products are manufactured using the latest cutting edge technology. As well as responding to clients requirements and the ever changing needs of the workplace, Maine drive their production and design forward utilising their skills, experience and expertise in engineering excellence.

The requirement of storage and filing within the workplace is becoming increasingly diverse. The requisite for more personal storage and the ability to file a range of digital material, as well as traditional paper filing whilst looking attractive is now required. Maine have designed a completely new range of Mainepure units which respond elegantly to this varied, office storage demand. The units have a clean façade with a unique, patented and innovative drawer-pull, which also functions as a label holder, this creates banks of units which look stylish and organised.

Mainepure units are available in the same wide variety of dimensions as Maine's classic Maineseries31 range, 59 heights and 5 widths. Maine units can be specified in any colour including tonal shades and corporate colours. Colours can be specified from BS, RAL, Pantone or Dulux Colour Dimensions palettes, as well as specialist paints including Hammerite, metallic, polychromatic and pearlescent finishes.
